

~~RAB9A, RAB11A, AND MODULATORS THEREOF RELATED TO INFECTIOUS
DISEASE~~

ABSTRACT OF THE DISCLOSURE

Disclosed herein are methods of reducing infection of a cell by a pathogen, for example to treat or prevent a pathogen infection. Exemplary pathogens include those that use a lipid raft. The disclosure also relates to methods of identifying agents involved in pathogen infection, such as modulators of Rab9A and Rab11A.

Please replace the Sequence Listing with the Sequence Listing submitted herewith. No new matter is entered.
